

MaxiCut®

proRange®

MaxiCut® combines cut protection with comfort, flexibility and dexterity for dry environments.

Technologies Inside this Glove

For protection against cuts

Innovative fibres - we source our base ingredients to develop our own unique high performance yarns and fibres that offer cut protection whilst maintaining high levels of comfort.

Reinforcement - between the thumb and forefinger, improves cut resistance and extends glove life in an inherently weak area.

Delivering 360° breathability

360° breathability - patented micro-foam nitrile coating offers 360° breathability making it the most breathable cut resistant glove on the market.

For reduced hand fatigue

Form, fit and feel - mimics the "hand at rest", reducing hand fatigue and increasing comfort.

Latest knitting technology - utilized to produce smooth and rounded fingertips, improving fingertip sensitivity.

Consistent liner penetration - from the nitrile, leaving only the soft liner resting against the skin.

For better performance

Optimized grip - delivered through our micro-cup finish, allows for a controlled grip.

For a gentle glove experience

We use our HandCare® Program for every single ATG® product. Not only do we make certain that all the elements used in our manufacturing process are safe for our employees, we also wash all the gloves after the production process as a further step in ensuring cleanliness. During this laundering process, we only use water that is rain-harvested, treated and continually recycled from our own water treatment facilities.

This enables us to guarantee our gloves to be "Fresh out of the pack" which is certified by Oeko-Tex® according Standard 100.

And if that wasn't enough our gloves are also dermatologically accredited by the Skin Health Alliance. The Skin Health Alliance seal gives, for the first time in the safety industry, professional glove users the confidence that ATG®'s full range of gloves are "dermatologically safe" and the science and research behind them is robust.

Of course our whole manufacturing process is in line with the requirements of the European REACH Regulation (Registration, Evaluation, Authorisation and restriction of Chemical Substances). We do not use any SVHC during our manufacturing process.

More information about HandCare® by ATG® is available at www.atg-glovesolutions.com.
