

MaxiFlex[®] CUT[™]

proRange[®]

MaxiFlex[®] Cut[™] is a cut resistant MaxiFlex[®] that remains super thin, flexible, dexterous and comfortable. It's also DMF free and free from SVHCs (REACH).

MaxiFlex[®] is dermatologically accredited and pre-washed prior to packaging enabling us to guarantee it "Fresh out of the pack".

Technologies Inside this Glove

For protection against cuts

Innovative fibres - we source our base ingredients to develop our own unique high performance yarns and fibres that offer cut protection whilst maintaining high levels of comfort.

Reinforcement - between the thumb and forefinger, improves cut resistance and extends glove life in an inherently weak area.

Delivering 360° breathability

360° breathability - patented micro-foam nitrile coating offers 360° breathability, making it the most breathable glove on the market today.

Longer use saves you money

MaxiFlex[®] has outstanding durability withstanding 18.000 abrasive cycles per millimetre thanks to the use of the DURAt[®] coating technology. MaxiFlex[®] has over twice the resistance of another other glove in its class.

For reduced hand fatigue

Form, fit and feel - mimics the "hand at rest", reducing hand fatigue and increasing comfort.

Latest knitting technology - utilized to produce smooth and rounded fingertips, improving fingertip sensitivity.

Consistent liner penetration - from the nitrile, leaving only the soft liner resting against the skin.

For better performance

Optimized grip - delivered through our micro-cup finish, allows for a controlled grip.

For a gentle glove experience

We use our HandCare[®] Program for every single ATG[®] product. Not only do we make certain that all the elements used in our manufacturing process are safe for our employees, we also wash all the gloves after the production process as a further step in ensuring cleanliness. During this laundering process, we only use water that is rain-harvested, treated and continually recycled from our own water treatment facilities.

This enables us to guarantee our gloves to be "Fresh out of the pack" which is certified by Oeko-Tex[®] according Standard 100.

And if that wasn't enough our gloves are also dermatologically accredited by the Skin Health Alliance. The Skin Health Alliance seal gives, for the first time in the safety industry, professional glove users the confidence that ATG[®]'s full range of gloves are "dermatologically safe" and the science and research behind them is robust.

Of course our whole manufacturing process is in line with the requirements of the European REACH Regulation (Registration, Evaluation, Authorisation and restriction of Chemical Substances). We do not use any SVHC during our manufacturing process.

More information about HandCare[®] by ATG[®] is available at www.atg-glovesolutions.com.

Also available in the MaxiFlex[®] range

MaxiFlex[®] Ultimate[™]

The MaxiFlex[®] Ultimate[™] has become the benchmark for precision handling in dry environments.

MaxiFlex[®] Ultimate[™] with AD-APT[®]

Now the iconic MaxiFlex[®] gets even better thanks to the inclusion of the new AD-APT[®] Technology from ATG[®].

MaxiFlex[®] Endurance[™]

The raised dots on the MaxiFlex[®] Endurance[™] offers increased cushioned for those doing repetitive jobs or carry heavy loads.

MaxiFlex[®] Endurance[™] with AD-APT[®]

Now the iconic MaxiFlex[®] gets even better thanks to the inclusion of the new AD-APT[®] Technology from ATG[®].

MaxiFlex[®] Comfort[™]

Offering extra insulation against heat and cold through high grade soft cotton that's plated inside the liner.

MaxiFlex[®] Elite[™]

Weighing only 14 grams the MaxiFlex[®] Elite[™] is our lightest and thinnest MaxiFlex[®] when extreme dexterity is needed.

MaxiFlex[®] Active[™]

Aloe vera and vitamin E are released while your work taking care of your hands during and after work.

Where to use: MaxiFlex[®] Cut[™] is designed for use in dry environments requiring precision handling with an increased risk of cut.
